

# Keys to Litter Box Success

1

## Right Litter Box

Boxes should be 1 ½ times the cats length. Most cats prefer an uncovered box.

2

## Right Litter

Most cats prefer clumping, unscented litter, 2-3 inches deep.

3

## Right Number

1 litter box per cat, plus 1 extra. At least one for each floor of the home.

4

## Right Routine

Litter boxes should be cleaned daily.

5

## Change and Stress

Cats may respond to stress by skipping the litter box. Pheromone collars are an option to help alleviate stress.

6

## Not Resolved?

Litter box issues can be a medical issue. Check with your veterinarian if problems persist.
